Freja eID Release Notes

These Release Notes describe all the changes made to the Freja eID systems from the previous release. They include:

- changes in the Freja eID mobile application from version [2.4.0](#) to [2.5.0](#)

Summary

- **Added My Pages Link to Settings** – Users may now access the My Pages web portal directly from the Settings menu in the Freja eID application.
- **Other Improvements** - The Freja eID application has also undergone several other under-the-hood improvements and bug fixes.

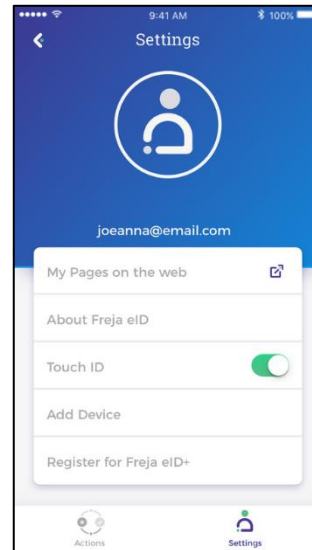

Added My Pages Link to Settings

Accessing the My Pages web portal has been made easier and more user-friendly. Users will now be able to reach the web portal directly via a link in the Freja eID mobile application instead of going through the Freja eID website.

Procedure

When users start the Freja eID application, they may open the Settings menu from the main screen and find a link that will take them directly to the login screen for My Pages.

The normal security measures for accessing My Pages still apply so users will need to authenticate themselves in the Freja eID application before being able to enter.

Any questions?

If you have any questions regarding this release, please get in touch with your contact at Verisec or send an email to partnersupport@frejaeid.com. You can also find more useful information about Freja eID on our website www.frejaeid.com.
