FREJA eID RELEASE NOTES

These Release Notes describe all the changes made to the Freja eID systems from the previous release. They include:

- Changes from version 5.0.0 to 5.1.0 of the iOS mobile app¹
- Changes from version 5.2.0 to 5.3.0 of the Android mobile app

These changes are expected to be released in Customer Environment on 28 October 2019 and in Production on 12 November 2019.

Summary

- **Support for Finnish and Danish** – In addition to enabling users from Finland and Denmark to add their passport to Freja eID in one of our previous releases, we've now also added support for Finnish and Danish languages.

¹ In the version 5.0.0 for iOS we added support for NFC passport onboarding for our users from the UK, Finland and Denmark. This feature was already released on Android in version 5.1.0 and covered in the Release Notes we published in September. The version 5.0.1 for iOS was also released, to resolve issues with iPhone Pro Max.

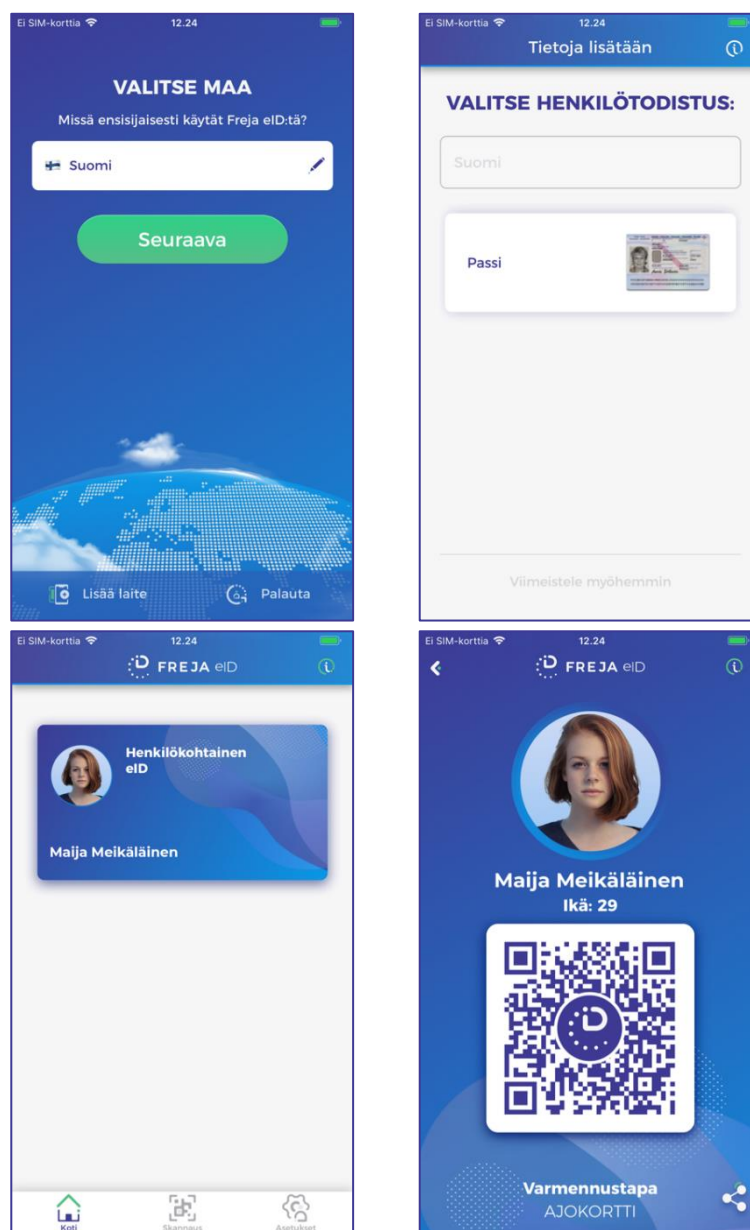

Support for Finnish and Danish

Freja eID is from this release fully supported in Finnish and Danish languages, in addition to Swedish, Norwegian and English (for Android users also Spanish).

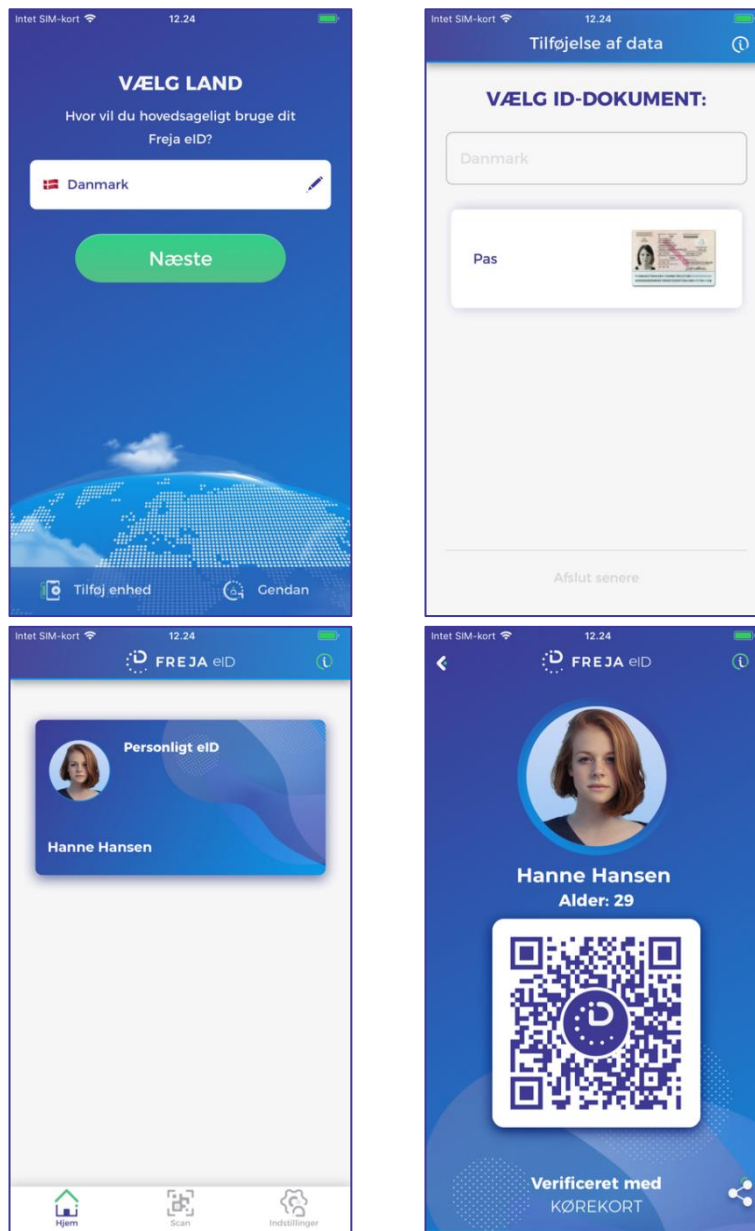

Please note that the language in the app depends on the language choice on the user's phone and **not** on the country choice inside the app. For example, if a user's phone is set to use English, the language in the Freja eID app will also be English, even if the user's chosen country is Finland.

An exception to this rule is the text of Freja eID Terms and Conditions and Privacy Policy, which are presented in Swedish if the chosen country is Sweden, in Norwegian if the chosen country is Norway and in English for all other countries.
